

## **ROSTER OF HEED FOUNDATION AWARD**

### **HISTORY:**

The Heed Foundation's mission is "To encourage and support education and research in ophthalmology and the ophthalmic sciences by providing postgraduate fellowships to individuals of exceptional ability. Education and research are the cornerstones of scientific advancement. The Heed Foundation promotes this advancement by providing postgraduate fellowship support to outstanding ophthalmologists who will pursue academic careers in ophthalmic patient care, education, and research."

We are proud of the fact that the Heed Foundation has recognized many of our residency graduates in the past several years. In fact, since 2009, the UCSF residency program is one of the most decorated programs in the US of Heed fellow awardees.
